TRANSITION PACK

2021

NAME

GCSE to A Level

This booklet has been designed to help you move from being a successful GCSE Mathematics student into an A Level student. The jump to A Level is larger than many students think and by spending time completing this pack you will ensure that you are ready to tackle your new course in September.

Over the summer holidays you may need to refer to revision materials to remind yourself of the content.

Please RAG the topics that are covered in this booklet. It will give you and your teacher an indication of areas of weakness so that we can best support you.
